Hints on How to Catch Sharks Now Terrorizing Summer Resorters on the Long Island and New Jersey Coasts

In New York State waters all black campaign. In New York State, waters all black base must be ten inches in length to be retained, and the limit is fifteen fish a day to one angler.

It is thirty years since Hermann Oelite was created for. The best balt in these waters for the shark is a chunk of fat pork. Next to that a live weak-

halt on New York city anglers.

Streams Within 10c. Fare Zone.

"Where can I get black bass fishing nearby?" is the repeated inquiry that has come to Tite Sun from various sources during the week. Long Island, New Jersey and the nearby up-State counties have a number of black bass streams within their borders. Evan streams within their borders. Evan streams within their borders. Evan staten Island has black bass streams.

On Staten Island, Clove Pond, which has produced big black bass, has been anasyste tigets. has produced big black bass, has been anassee tigers.

Brooks's pond and Martling's pond, Both are located in back of West New Brighton and are reached by taking the filter Lake cars at the ferry at St. George and transfering at Castleton corner to the Manor road line. Get off at Martling's lane or Curtis avenue and three minutes walk will bring the angler. The first rush of the fish carried away to the pond referred to.

Rosemary Lake at Huntington is stocked with small mouth black hass. The streams on Long island controlled by the Brooklyn Bureau of Water Supply include the following:

Apringfield, Conselyea, Simonson, Valley Stream, Watts, Smiths, Pine, Hempistead, Hempistead Storage, Reservoir, Milburn, East Meadow, Smart's, Vallemith, Mollineux, Newbridge, Wantagh, Massapequa, Pond and Lake.

Applications for fishing permits on Long Island should be made to J. F. Langthorn. Deputy Commissioner, 50 Court street, Brooklyn.

William Williams, Commissioner of the Department of Water Supply, whose office is in the Municipal Building, has jurisdiction in the following streams in Westchester and Putnam counties:

Reservoirs—Boyd's Corner, West Branch, Middle Branch, East Branch (Bodom Hog Brook), Croton Falls, Titicus, Amawaik, Cross River, Croton Lake and Croton Lake (Muscoot Basin), Lakes and Ponds—White Pond, Lake with a three way swivel in the

Tear after year it is harder to get good black bass fishing because the restocking of streams do not keep up with the great increasing army of anglers and newcomers who find this pastine worthy of perusal.

Only the other day The Sun mentioned the fact in a paragraph that a good nearby bass stream was Grassy Bprain Reservior, under the control of the Bureau of Water of Yonkers. So many applications came from Sun fishermen that the commissioner had to call a halt on New York city soules.

Was unclaimed.

Several years ago The Sun printed a number of stories showing shark attacks on human beings but none of these were north of Hatteras. They were all in the waters of Georgia, Florida, Cuba, the Guif of Mexico or else in the tropics where there have been innumerable instances going back to the time walking stick.

Dubbed Taken the reward the sear of the boat has parted the shark makes a mighty plunge downward. JAMAICA BAY AN IDEAL SPOT FOR WEAKFISHING

Thousands Taken Each Season From Local Waters-Anglers Derive Great Pleasure From Sport Organization of Guides Is Needed.

By ARTHIR KNOWLSON.

Weakfishing in local waters is a glorist the result of ignorance of the conditions out sport from which thousands of anglers from the vicinity of New York derive great pleasure. These sporty fish enter the bays and arms of the sea in this section about the end of May, though sometimes earlier. Their spawn is deposited quickly, just as soon as the water in the bays reaches the needed temperation the bays are as to pass in the bays reaches the needed temperation quietly into the water as it is to the reach the sead of thing to chum. In a short white dog they attracted to the boat all the dog fish for miles. The dogfish dined sumptions and laying out a set of fishing rules to be riskly followed.

These rules would quickly become familiar to every fisherman and beatman in the bay. It is just as easy to pass in front of anchored boats as it is to the reach. It is just as easy to drop an anchor quietly into the water as it is to the reach the reach that it was the greates sport ever. Occasionally a poor sea has wandered to the feast of shrimp, shedderable into the boat. When the properties of the conditions are reached to the boat all the dog fish for miles. The dogfish dined sumptions and laying out a set of fishing rules to the surrected through the guides organizing and could be corrected through the guides organizing and laying out a set of fishing rules to the form miles. The dogfish for miles. The dogfish for miles. The dogfish for miles. The dogfish to the boat, where they had a little dog fish for miles. The dogfish to the boat water as it is to the reach the properties of the same and strain May.

Cause Escape.

The outfit which landed the fish was a No. I single gut sproat hook, a three foot single gut leader and a six thread special line. Men who can handle rods like this, and there are many who can surely should get together and consolidate their ideas to govern the fishing in the bay. It would be a splendid move forward and would be appreciated by all who love weakfishing. So get busy, Harris, Revinus, Davis, Lewis, Homan, Baldwin, Knipe, Grounler, Anshach, Van Houten, Seaman, Lockett, Davenport, Johnson and company.

The Sun would like to have the cplnion of weakfishmen on this sug-

and on the inshore grounds.

Coming up on the smoking car of a train from Wreck Lead the other day fishermen having large catches of sea base in grips, suitcases and other receptacles as a result of their trip got to telling queer and unusual stories about this most popular fish of the summer season. and on the inshore grounds.

The subject was introduced by Capa White's famous story.
Capt. Frank White of the Atlantic of Wreck Lead likes to tell fishing yerns. This is his prize sea bass yern when others begin talking about the

when others begin talking about the big fish that got away:

"There was a big sea bass on the Long Beach grounds and nearly every one fishing here had hooked him one time or another, but he aiways got away. I tried to catch him myself a dozen times, but never could land him. "But at last I did get him. I had an onion, and, putting it on the hook did not have my line down more than a minute when there was a rush, a a minute when there was a rush, a gleam of black, and the old bas-jumped clear out of the water, but i had him hooked fast."

"Good to eat?" inquired a listener,
"Great Scott!" replied the captais
"I didn't try to eat him. He was full a
hooks. I sold him for scraption."
